Opinion poll

1st survey 2006

TABLES OF RESULTS

Youth and Employment

**INJUVE Study
EJ106**

The REPORT "YOUNG FIGURES – OPINION POLL", aims at providing the results of the POLLS ON THE OPINION AND SITUATION OF THE YOUNG carried out by INJUVE, in order to learn about the opinions and attitudes of the young regarding their personal situation, relationships, aims, motivations and life styles.

Technical Council for Assessment and Planning
Documentation and Study Service

TECHNICAL FEATURES OF THE SAMPLE "YOUTH AND EMPLOYMENT"

Scope	National
Universe	Spanish population of both sexes, aged 15 to 29.
Sample size	1469 interviews
Affixation	Proportional
Sampling points	115 municipalities and 45 provinces
Sample procedures	<p>Multi-stage, divided into strata, selecting the primary sample units (municipalities) and the secondary units (sections) with a probability according to its size, and the last units (individuals), through random routes and sex and age quotas.</p> <p>The strata have been formed by combining the 17 autonomous communities with the size of the habitat, which is divided into 7 categories: below or equal than 2,000 inhabitants; from 2,001 to 10,000; from 10,001 to 50,000; from 50,001 to 100,000; from 100,001 to 400,000; from 400,001 to 1,000,000, and over 1,000,000 inhabitants.</p> <p>The surveys have been done following a personal interview system at home.</p>
Sampling error	In the simple random sampling, with a confidence coefficient of 95.5% (two sigma) and $P = Q$, the real sampling error is ± 2.6 %.
Dates	9 - 15 January 2006
Field work:	Centre for Sociological Research (CIS)

CONTENTS:

- Current occupation
- Importance of unemployment in Spain
- Causes for unemployment: economic situation of the country, comfort of the people, Government policy, bad management on behalf of employers, lack of qualification/training of employees
- Reasons to explain unemployment amongst the young
- Valuation of jobs
- Would accept a job involving: geographical mobility, lower qualification, low salary, difficult family arrangements
- Most important and most valued aspects of a job
- Preferences between type of contracts and shifts
- Professional experience of the young

First job:

- Age when they got their first job and educational stage they were at
- Time they took to find a job after completing their studies
- Connection between work/studies, type of contracts, type of shift and reasons to work part-time
- Hours worked per week
- Ways to find a job
- Valuation of several aspects to do with their first job: salary, job stability, creativity, connection with studies, perspectives for the future
- Continued with first job; if not, reasons to leave first job and number of jobs they have had

Current job:

- Connection work/studies, type of contracts, type of shift and reasons to work part-time
- Hours worked per week
- Ways to find a job
- Valuation of several aspects to do with their first job: salary, job stability, creativity, connection with studies, perspectives for the future
- Professional situation, occupation and activity of the company
- Monthly salary (net)
- Possibility of losing first job
- Resignation
- Level of satisfaction with current job

Not working

- They have been looking for a job for the last 3 months
- Time looking for a job
- Would accept a job involving: change of residence, change of job, lower salary, lower category
- Political ideology
- Nationality and year they arrived to Spain
- Civil status or cohabitation situation
- Economic dependence or independence
- Usual place of residence
- Occupation
- Religious beliefs
- Centre where they studied primary education
- Level of qualification
- Person earning the highest income at home
- For that person when it is not the youngster him/herself: occupation, professional situation, professional relationship of the payees and activity of the company

Results per SEX AND AGE GROUPS

PI.
Let's start by talking about your occupation. Could you tell me which of the following situations applies to you?

	Total	Sex		Age groups (3)		
		Men	Women	15-19	20-24	25-29
N=	(1469)	(762)	(707)	(437)	(485)	(547)
