Organized together with Onuma Milestone 22, a local NGO made by President of Fishermen's Cooperative and Director of international exchange association since 2004. Though Onuma lake has been a popular tourism spot for a long time because of its beautiful scenery, it has been polluted by over use of agricultural chemicals in cattle farming and erosion from abandoned forests with alien trees. President of Cooperative has bought a forest and wants to revive it to original nature with native trees!

W: We will remove some alien conifer trees that disturb growth of other plants and animals and also help to prepare/ run/ clean up the Lake Water Festival on 24-25 Jul. We will also make and put the carbon fivers in the lake to purify the water with some specialists. Part of World Tanabata Action.

Description of Workcamp: NICE-14-67 Hoshino (Fukuoka) 08/16-08/30 ENVI, KIDS 12 vols. (6 int.)

Organized together with a local group formed for this project since 1999. This village has received the first prize at the national contests for visibility of beautiful stars in the sky and tiered paddy fields. In spite of the town's natural heritage, depopulation (especially of youth) is a serious problem here similarly with many other parts of the country side in Japan. We aim to help with nature conservation and to activate the area through workcamps.

W: We will work in the forests doing activities such as hiking and cutting bushes in maintenance of the forest by which we can contribute to nature conservation through global voluntary power. We will also join a kid's camp, which will be held in this village for few days.

S: Effective cases of activated depopulated areas in each country. Bring some info..!

A: A community center. SB! CV
