# REGULATIONS FOR OPEN CALL

With the aim of supporting emergent creation, LA DOCE presents the OPEN CALL for the Residency Program in LA DOCE 2018.

LA DOCE has a regular program of activities, but also wants to be receptive to collaboration opportunities in projects arising in its immediate environment. It is also in the interest of this space to contribute to the consolidation and growth of the local artistic sector. In order to do that, LA DOCE offers up to three joint work positions at the disposal of the sector in order to host research and/or production residencies by different artists.

Between 3 and 6 work spaces in the coworking space La Doce will be selected through this open call, for research and production of visual artists, as well as accomodation in the centre of Boiro, between 4 and 8 weeks to be carried out between September 1st and October 31st, 2018.

This open call is aimed at artists and creators who share the contemporary arts as their language (painting, sculpture, installation, videoart, photography, etc). With the aim of promoting cultural and social exchange, a minimum of two projects will be selected, a project by an artist from the Autonomous Community of Galicia and another project by an international artist coming from the European Union or whose visa is duly in order.

The selected resident projects will have a working space in La Doce coworking area, which includes a desk, chair, high-speed internet connection, locker for personal use, water and natural light. All spatial, technical and human resources will be available for each project depending on availability and opening hours. Also, accomodation is available in the centre of Boiro during the stay, in a flat equipped with all necessary things for private life.

At the end of the stay, a collective exhibition will be considered within the space of La Doce gallery or in other urban and rural environments, according to the nature of the project to be carried out.

In consideration, the artist is committed to the completion of at least one activity related to the research or production subject during his/her residency.
